LoLme.gg

LoLme is a multi-account analytics tool for League of Legends. The purpose of this tool is to allow users to combine multiple accounts to analyze a single set of statistics.

When analyzing data for players or teams, it would be useful to view statistics for more than a single account at a time. While there are plenty of sites to view your match history or overall winrate statistics, the options for merging those stats are rather limited. The goal of LoLme.gg is to provide a single interface to view statistics for multiple accounts, be it all the accounts of a single player, or all the players in a team. This site will pull data from Riot Games' API to provide a clean graphic to display the requested data in a clean and understandable format.

Personas:

Josh - Casual Player
This player plays on three different accounts. He uses LoLme.gg to view his statistics in one place, often sharing screenshots with his friends.

Arnald - Professional Coach
Many higher-rank players play on multiple accounts, so Arnald uses LoLme.gg to compare the statistics of potential of players he is considering for next year's roster.

Comps:

OP.gg and DeepLoL.gg
I've combined these two sites since they generally accomplish the same thing: showing player statistics. While they both allow you to view multiple accounts side-by-side, neither offers combined statistics.

LeagueOfGraphs.com
League of Graphs on the other hand offers more in-depth statistics and leaderboards, it does not offer any other way to compare multiple accounts.

Text input and
"Search" button
_____
Submit list of
usernames

Data is pulled
and shown to
the user.

Text input and
"New Search"
button
_____
User submits
a new list of
usernames

This represents the
path users take to use
this website for checking
user account data.
